18th Century Nativity Scene

2 200 EUR

Period : 18th century

Condition : Prévoir restauration

Width : 30

Height : 36

Description

Antique nativity scene from the 18th century, composed of a stuccoed and gilded wooden structure, with a painted background. An angel carved in alabaster is integrated into the decor, bringing a precious touch to the whole. The characters, dressed in old fabrics, bear witness to the craftsmanship of the time. This nativity scene, probably of Italian origin, is weakened by time. Note: a glass is broken and the object has suffered from humidity,
