Description

Imagine what this little drop of glass could have avoided if it had followed its destiny.... For the record, imagine a beautiful luxury hotel in the 19th century, where each room was heated by a hearth or an individual stove... This comfort sometimes led to a piece of slag causing a fire to start... Without rushing, the occupant opened a small niche in the wall, took the drop of glass and threw it on the ground... The liquid contained escapes from its glass shell and the thick smoke it releases, smothers the beginning of the fire... Won. Fortunately for your collection, this delicate object survived, without any drama to its credit.
