JC NOVARO has been passionate since his youth and his reputation is slowly built, first in Paris with the great success of the lamp that lights up at the same time. His workshop is in Biot where he works on new techniques, notably the inclusion of gold and silver in his works. Then he opens a gallery in the lower part of his workshop. His greatest success came in 1987, when an exhibition at the Musée des Arts Décoratifs featured four of his pieces selected by Jack Lang.
