Description

Decorative bronze element, with an organic composition: a stylized branch decorated with ribbed leaves, contained in a hammered oval frame. The bronze work, with its controlled irregularities and vibrant textures, powerfully evokes the poetic universe of Diego Giacometti. An identical model, attributed to Diego Giacometti, was sold at Sotheby's on May 28, 2024. This piece came directly from the artist, which confirmed its attribution. This example bears an engraved signature that we have not been able to identify to date. A decorative piece with timeless charm
