Description

Napoleon III period perfume box in varnished and marquetry wood, two crystal bottles inside with gilded brass stoppers, decorated with two small painted scenes representing two Parisian monuments: the Pantheon and the Vendome Column. The box closes perfectly with its original key. The exterior box has a very beautiful sober checkerboard marquetry. Very beautiful object in perfect summer; note: one of the stoppers is detached from its screw thread at the back (no impact on the appearance and quality of the bottle)
