

Telegraph Morse Recorder, Gerosa, Late 1800

1 400 EUR

Signature : Flli Gerosa Officina elettrica

Period : 19th century

Condition : Très bon état

Material : Brass

Description

Telegraph Morse recorder used in telegraph offices from 1860 until the mid-1950s. The recorder received the Morse signal from the transmitter station. The current passing through the coils of the recorder generated a phenomenon of electromagnetic attraction and was connected to an ink pen. The paper strip was sliding at a constant speed guided by a spring mechanism. This system made it possible to print on paper the message received as proof of receipt. This recorder is one of the first models used in the post offices of the Kingdom of Italy. The two initials R.R. engraved on the base indicate that it is an instrument belonging to "Regie Poste Italiane". The recorder is made of brass and rests on an oak base. Late 1800s. Built by "Officina elettrica Fratelli Gerosa di Milano". In working
