

## Heraldic Coat Of Arms In Carved Stone

2 800 EUR

Period : 19th century

Condition : Bon état

Material : Stone

Width : 66 cm

Height : 77 cm

### Description

Elegant , of probable Italian origin, dating back to the 19th century. The central blazon, enclosed by a mixtilinear frame richly decorated with volutes and curl motifs, presents a sailing ship with sails spread over engraved waves, surmounted by a noble crown. The fineness of the carving and the symmetry of the ornamental elements suggest high-quality craftsmanship, probably intended to adorn the facade of a noble palace or an institutional building.
