

L.klein Ophthalmic Surgery Instrument

445 EUR

Period : 20th century

Condition : Très bon état

Material : Other

Length : 29cm

Width : 18 cm

Height : 5 cm

Description

In front of this complete sterilizable box, which contains no less than 56 instruments, I shudder... Just thinking that the Egyptians had practically the same ones, for precise ophthalmic interventions... Only the materials have changed... Steel and titanium they did not have. So, I will be grateful to you for the inventory of the said box, the photos will do it better than me. Many DIY enthusiasts, jewelers, watchmakers, model makers, sculptors, restorers... also use them in their art. I will do the calculation for you: 445:56 = less than 8 euros... a great opportunity.
