Description

- Stone fountain of neoclassical inspiration, work of the 20th century. Fountain whose molded decoration takes up the ornamental vocabulary of ancient architecture; a perfect symmetry, a flat relief, a modenature punctuated by a vertical decoration. Like a base or plinth, the ornamentation of this fountain is composed at the top and bottom of moldings in return of square alternately flat, curved, convex or concave (inverted cavetto, heel, bevel, beak of corbin ....). These frame a central space decorated in its center with a motif of table in flattened relief, the pipe is positioned just above it. - With a simple and elegant modenature, this fountain will integrate with ease in an interior as well as exterior decor. - Good state of conservation, chips are to be noted (See photos), ready to be installed.
