Description

Beautiful art-deco vase "les nenuphars" by Pierre d'Avesn. Model well known to amateurs and clearly referenced in the productions of Pierre D'Avesn. Beautiful vase typical of the art-deco period in pressed-molded glass decorated with stylized water lily flowers. Beautiful ball shape on heel with small wavelets. Note especially this very bright intense blue color. The color is close to the so-called "Majorelle" blue with a certain fluorescence. Height: 21 cm, circa 1925, very good condition. Very beautiful art-deco vase, remarkable color.
