140 EUR

Period : 19th century

Condition : Etat d'usage

Material : Cardboard

Description

- maximum height 23 cm. and circumference 52 cm. for this crown which does not correspond to a very large head compared to our hat measurements, it is perhaps a crown for religious rites.....- note well that this piece is in used condition, with multiple traces of use, both on the paint and on the cardboard / paper -- we present a similar piece then, which is fixed on a support or is on the back, handwritten, the date 1835 - 1851, but we are not able to confirm, or contest this mention, one thing is sure, these are indeed old pieces -
