

Hearth Shovel - 18th Century

200 EUR

Period : 18th century

Condition : Bon état

Material : Wrought iron

Length : 76 cm

Description

18th century wrought iron shovel. Three-part handle, cylindrical at the bottom and top and flat in the center. This handle ends with a hanging hook. The shovel is cut and assembled by hot forging on the handle. This tool has been used, which explains the strong oxidation marks in the hollow of the shovel and the lack of material. Good condition. Length: 76 cm
