Description

Sea coconut seed, also known as Cocofesse.Polished seed of Lodoicea maldivica.Height : 12,59 inTotal height : 15,35 inWidth : 10,03 inDepth : 6,29 in"Coco De Mer" The sea coco is the palm tree with the largest coconuts in the world. It only grows on the Seychelles islands of Curieuse and Praslin. The growing place of the sea coco was only discovered in 1768 by a French expedition. Before that, nothing was known about its origin. A popular belief was that it came from an unknown palm tree growing in the sea, hence the name Coco de Mer. This fruit with a still somewhat erotic shape was already attributed to a woman's rump in its scientific name. Lodoicea callypige, whose species designation cally-pige means beautiful rump in ancient Greek. The coco
