Description

Important tall Art Deco bird light sculpture lamp circa 1930 by master glassmaker Marius-Ernest Sabino. It is made of thick molded-pressed glass. With a domed shape, the glass is crossed by geometric arcs to highlight a highly raised decoration of three stylized twirling birds. The lamp rests on a nickel-plated bronze frame and stepped base highlighted by a typically Art Deco geometric frieze with four legs. Very nice proportions allowing a diffusion of light and accentuating the decoration by its perspective. This lamp is electrified and perfectly functional. Signature stick inside the glass "Sabino" and numbering 4804P FRANCE Very good original condition, chips of use on edge of the glass in frame not visible Height: 41 cm Width: 26 cm
