Description

Sunstone is a poetic curiosity of nature. It always reminded me of a caramel sprinkled with gold dust. It's actually hematite inclusions in a natural stone. Here, it was used for the cabochon of a tie pin and the cufflink trays, and the stone on the silver ring . The stones are mounted on metal. This sparkling character is very much in keeping with the Art Deco era. It's perfect with a chic three-piece suit or a slightly shocking one, a bit like a punk. The square trays of the buttons are 2 cm on each side.Diamètre ring inside : 18 mm
