

## Etruscan Gold Ring Decorated With A Scarab

15 500 EUR

Period : Before 16th century

Condition : Très bon état

Material : Gold

### Description

Gold swivel ring with carnelian scarab Etruria, 4th century B.C. Gold and Carnelian Perfect condition US Ring Size: 9 1/4 EU Ring Size: 60 This high-karat gold ring features a swiveling bezel set with a carnelian scarab. The flat underside of the scarab is engraved with a rare depiction of Poseidon shown in profile, with one foot resting on a dolphin. The sides of the scarab are encircled by a central band adorned with filigree spirals punctuated by granules. This section is bordered by filigree and twisted wire filigree. The upper part of the setting forms a frieze of wolf's teeth. The scarab rotates around a gold wire passing through its body, the ends of which emerge and are securely coiled around the ring's shoulders. This piece is a significant testament to the technical mastery and sense of composition of
