Description

Vintage Educational Anatomical Model dating back to 1981, made in the USSR and used in schools at the time as a visual aid for the study of comparative anatomy and mammalian evolution. A rare and perfectly preserved object capable of telling the story of Soviet science and education.

Three specimens showing the evolutionary adaptation of the forelimb in mammals, highlighting three different functions:

Rat - limb adapted for locomotion

Mole - limb adapted for digging

Bat - limb modified into a wing for flight

Housed in its original box, with printed texts in Russian.

Provenance: Ukraine

Dating: 1981
