Description

In an Art Deco style and period, here is a series of twelve small liqueur glasses in uraline glass playing perfectly with the light by offering wonderful reflections between yellow and green. These glasses have a wide and flat base and are rather tall with flat cut ribs. These glasses are accompanied by a tray also in uraline, molded with hollow designs and obviously not matching the glasses, nor from the same period but I had them together and therefore join this tray to the glasses. Shipping in France and internationally, contact me for the terms
