Description
-------------

For those who know how to travel in style, here is a chrome-plated metal tumbler in three parts that fit together to form a small whisky glass... It is still presented in its cardboard case from the beginning of the 20th century, inside its lid is a small paper label that could have given us an indication of its origin except that with the opening and closing of the box over the years, this has faded. But, by Jove, if this tumbler is not of English origin I am the Queen of England. Shipping to France and internationally, contact me for terms and conditions
