

Walter Donner (attr) For Doria, Brushed Aluminum 'donut' Lamp, Space Age Design, Ca 1960

1 250 EUR

Period : 20th century

Condition : Très bon état

Width : 38

Height : 43

Depth : 38

Description
-------------

Table lamp with a Space Age design, in brushed aluminum, with a rounded circular shape reminiscent of a ring. The style evokes the creations of Joe Colombo or Carlo Nason and could also be part of the work of Walter Donner. The lamp bears an original label from the Italian manufacturer Doria, active in the 1960s, which attests to its provenance. The indirect lighting is diffused by an orifice located on the top, intended for a half-chrome E27 bulb (LED for example). The light rendering is soft and elegant. Despite extensive research, no other trace of this model has been found, which underlines its exceptional rarity on the market. Very good general condition: no shock or deformation of the metal structure, electricity in perfect working order. Slight signs of use are visible in the photos. A
