Description

Earrings in 750/°° white gold (18 KT, owl hallmark) made according to the classic jewelry combination "colored stones - diamond surround", such as pompadour and daisy rings. The colored stones here are beautiful emeralds, with a drop (pear) shape suitable for wearing as earrings, giving an effect of length and femininity to them. The effect of length is accentuated by a line of three diamonds set with prongs on a fixed motif on the ear. The emerald pears are suspended and mobile, so as to capture the light, a brilliance that is also brought to them by their diamond surrounds. The claw setting reveals only the stones for a very luminous, purely jewelry-like effect. These earrings for pierced ears are fitted with rod/alpas systems, the most secure clasps available, adjustable and discreet.
