Description

Bas-relief work with mixed technique with cement glue, acrylic tempera and iron depicting an abstract composition, signed and dated lower right M. Ilaroni '94.The artist was born in Florence on January 30, 1964, where he currently works. The value and expressiveness of his works are underlined both by a constant attention to shapes and details, and by the innovation of techniques and materials, often poor and recycled. The works are experienced by the Artist as creatures in "continuous becoming", where nothing is certain and predictable a priori and where everything is absolutely dynamic and changeable with the inexorable passing of time.50x35,5 cm
