Description

Superb pair of Art Nouveau vases in iridescent glass in the style of Loetz. Mauve gradation and brass mount with flower decoration, 1900 period. Height: 32 cm Ø at the neck: 11.2 cm A very pretty rendering for this pair of vases. Good condition but I would like to point out a small defect on the back of one of the vases (like a chip in the enamel) nothing too bad and it is on the back.
