Description

Jaeger LeCoultre's Atmos Élysée clock, made of rhodium-plated steel and glass, with the reference 223.116.1. It is equipped with caliber 544/base 540a, allowing the display of hours, minutes, moon phases, as well as a temperature indication and a hygrometer hidden within the mechanism. This model is distinguished by its perpetual mechanism powered by atmospheric pressure. Its matte brushed silver dial displays blue Arabic numerals at the 3, 6, 9, and 12 positions, accompanied by eight applied hour markers. The cage, also made of rhodium-plated steel and glass, measures 23 x 20 x 15 cm. The mechanism and case bear signatures as well as a serial number. A service was carried out in 2014 at the Jaeger LeCoultre manufacture, and the clock has remained unused since. The item comes with its
