

Polychrome Porcelain Jug And Basin

400 EUR

Period : 19th century

Condition : Bon état

Material : Porcelain

Description

Elegant toilet set consisting of a jug and its basin in richly decorated polychrome porcelain. The set is distinguished by an intense cobalt blue background enhanced with fine gold fillets and highlights. The jug presents a lively scene inspired by the world of the Flemish painter David Teniers the Younger, famous for his depictions of genre scenes and peasant life. We can see several characters gathered in an inn, in a lively and friendly atmosphere. The decoration is finely executed, with a great wealth of details and particularly luminous colors. Probably work of 19th century European porcelain, in the romantic style, in the spirit of the productions of Paris. A decorative piece of great finesse as a collector's item
