

## Elegant Halo Ring In 18k Yellow Gold Set With Sapphire And Diamonds

1 300 EUR

Period : 20th century

Condition : Parfait état

Material : Gold

### Description

This refined ring artfully blends the royal blue of sapphires with the timeless brilliance of diamonds, all set in warm 18K (750?) yellow gold. At its center, four round sapphires totaling approximately 0.20 ct are aligned vertically, their deep blue cornflower hue enhanced by a halo of twenty-eight brilliant-cut diamonds (? 0.30 ct in total). The diamonds, precisely grain-set, create a continuous frame that highlights the brilliance and depth of the sapphires. The elongated oval base plate tapers to a polished band, providing both comfort and a flattering silhouette on the finger. Worn alone as a statement of elegance or stacked with other pieces, this ring's classic halo motif and perfectly symmetrical stones will remain a favorite. Its versatile design is equally suited to day or evening, promising scintillation
