Description

Hand-colored etching
The collection of fish and other products from the seas of Spain appears to have an exclusively ichthyological purpose, but the writings of the project's ideologue, the enlightened Antonio Sáñez Reguart, demonstrate that it was a response to a series of environmental problems, reported as early as the 18th century, such as the overexploitation and devastation of the seabed by the use of trawls. 36 x 24 cm / 48 x 36 cm framed
