Rochester Optical Universal Camera Circa 1895

800 EUR

Period : 19th century

Condition : Très bon état

Description

Very beautiful Rochester Optical Universal camera for 13x18 format. This American camera, in English style, is built in varnished mahogany and brass fittings, also varnished. The lens is removable to be able to close the camera which unfolds to 45 cm long because it is double extension. The imposing bellows, conical in shape but with a square section and square corners, is made of coated canvas. It is equipped with a vertical decentering mechanism, completed by a tilting function from the rear of the camera. link on our site https://www.lavalisearlesienne.com/product-page/chambre-photographique-rochester-optical-universal-circa-1895
