Description

This cherub's head, to be placed on the first part of the 17th century, is in polychrome wood, it presents a face with a clear forehead and full cheeks with a very beautiful polychromy, a hollow chin. The hair is arranged in thick curls. We note small incidents in places on the polychromy and the gilding. The whole remains however in good general condition considering the period. We carried out a summary cleaning. For the condition, please detail the photos. Do not hesitate to zoom. The photos are an integral part of the description.
