

Gregorian Type Reflecting Telescope

1 500 EUR

Period : 18th century

Condition : Bon état

Material : Brass

Length : tube sans et avec oculaire : 36 et 43 cm

Height : 31 cm

Description

Unsigned, Late 18th century - Early 19th century
- Early 19th century. The instrument, also called a salon telescope, is installed on a folding tripod baluster stand for astronomical observations made on a table. On one side of the tube, a screw allows the adjustment of the two mirrors. A ball joint which ensures the support and orientation of the tube, is housed in a spherical part which unscrews. Beautiful instrument, probably French, the feet and the center of the tripod are engraved with the number 8. Optics in good condition, without closing cap.
