33 Diamond Pavé Ring In 18k Yellow Gold, Late 20th Century

2 000 EUR

Period : 20th century

Condition : Bon état

Material : Gold

Description

Celebrate light and form with this sumptuous late 20th-century cluster ring. Crafted in 18K (750?) yellow gold, its wide, gently tapered band supports three rows of 33 round brilliant-cut diamonds, totaling approximately 1.30 ct. Each stone is prong-set in a tightly packed pavé setting, creating a sparkling tiled effect that catches and reflects the light from every angle. The band's generous width combines a strong presence with elegant comfort, making this piece a true signature piece, worn alone or with a thinner wedding band for a stunning stacked effect. The warm hues of the gold and the precision of the setting reflect the French artisanal excellence of the 1970s-1980s, while the timeless geometry guarantees a charm that transcends fashions. Technical sheet Ring size: FR 51 / US 6 ¼
