

Khmer Lime Pot, Cambodia, 12th Century

Description

Khmer lime pot. Small, squat, globular pot in the shape of a bird covered with an olive-brown glaze, stopping short of the raised foot. It has several details: an owl's beak and protruding eyes in relief, a suggestion of feathers on the tail, incised concentric rings around the opening, and vertical lines on the body. The beak and tail have a small lack. Good general condition (see photos).
