Description

A solid silver vegetable dish...Checked with a 1st title Minerva...That is 950/1000...From the silversmith ASESIO - 75019 PARIS - FRANCE...With its original lid...And for once its removable interior...Which allowed to put a little hot water in it to keep the heat...Quite a rare system...Moreover I have already had it for sauceboats or vegetable dishes in silver metal...In good condition, some fairly light and inconsequential dents...Moreover not very visible...It has no initials engraved...The hallmarks are on all the pieces...It is therefore quite heavy...The model for the frieze of the lid is a contour net...The grip and the handles a fairly soft rocaille...To finish it is on a small, very discreet foot...Weight ... 1 kilo 558 gr
