Description

Beautiful model of a pepper mill of Ottoman origin, second half of the 19th century. Very beautiful copper chiseling with arabesque decoration on the entire object. Old assembly. Condition of the object: The crank still turns quite well on its axis. The upper part allowing the addition of peppercorns is blocked and does not allow opening. The lower part where the ground pepper is recovered is in very good condition in view of its age. Beautiful collector's item. Free shipping for mainland France. Contact by email preferably. I remain at your disposal for further information or additional photos.
