

Didactic Mechanical Model In Bronze And Wood - 19th Century

750 EUR

Period : 19th century

Condition : Très bon état

Material : Bronze

Description

Rare and fascinating educational mechanical model dating from the 19th century, made of bronze and mounted on a noble wood base. This type of object was used for educational purposes, often in technical or engineering schools, to illustrate motion transmission mechanisms or complex kinematic systems. The mechanism is finely crafted in brass (gilt bronze), with precise articulations fixed on a solid wood panel. This is a historical piece that is both decorative and instructive, perfect for a cabinet of curiosities, a scientific collection or an interior with an industrial or steampunk style. Condition: Very good condition, with a beautiful patina on the bronze and wood, consistent with the age of the piece. Dimensions: 114 x 35 x 12 cm Period: 19th century Materials: Bronze and wood
