

## Dandy Cane Assembled From Horn Rings Art Déco

180 EUR

Period : 20th century

Condition : Parfait état

Material : Horn

Length : 92 cm

Description
-------------

Made entirely of horn in different colors: light, brown and black. It is a montage of pieces of horns pierced and assembled on an iron rod blocked by an iron ferrule at the bottom and by an ovate pommel. This Art Déco dandy's cane-stick has acquired patina over time, this to tell you that on each side of the brown parts there is a black ring, less visible to the naked eye today, see photo. Note some traces of wormholes which are later than its manufacture. Shipping in France and internationally contact me for terms
