URQUIOLA VERY BEAUTIFUL MODEL
ALMOST OUT OF STOCK RARE TO FIND IN
PERFECT CONDITION SERVICE ALSO ON
SALE TO FOLLOW** Height 22 cm Diameter 25
cm Patricia Urquiola, designer and architect of
Spanish origin, is one of the most brilliant female
figures in contemporary design. In 2001, she
founded the Patricia Urquiola Studio with Alberto
Zontone, operating in the fields of product design,
architecture, art direction and strategy consulting.
Her style is based on a fundamental principle:
thinking about spaces or objects in relation to
people. This approach is reflected in all her
works, considered great masterpieces of design:
from the Moroso Klara, Mathilda, Fjord and Lilo

armchairs, to the Husk and Crinoline seats and the Bend Sofa B&B Italia; From Kartell's T-Table coffee tables to Boffi's Salinas kitchen, from the Cassina Sengu collection to Shimmer Glas Italia, to name a few. The Landscape collection for Rosenthal combines simplicity and softness with a rich surface texture. These exceptionally fine translucent porcelain shapes create ceramic surfaces with varied and complex decorations. The pattern is irregular, sometimes filling the shape, sometimes escaping from it. Landscape is a unique service that combines smooth and textured surfaces, solidity and translucency, and Western and Eastern ceramic styles. Landscape is a romantic and sophisticated collection designed by Patricia Urquiola for Rosenthal Studio-Line, which enriches the table with elegance and sophistication. The coffee cups and saucers, made from the finest white porcelain, feature soft shapes and organic decorations that recall nature in a refined and contemporary way. The decoration, fused into the glass at over 1000°C, penetrates deep into the porcelain surface. This process guarantees extraordinary resistance to scratches and abrasion, preserving the vibrancy of the colors and the integrity of the design over time. Lightweight yet sturdy, the cups are ideal for everyday use and special occasions, combining practicality and style in a single creation.
