#### Description

Frame. Carved and gilded wood. 18th century.  
Minor flaws. Rectangular frame (the shorter side is the bottom) in carved and gilded wood decorated with a thin interior molding adorned with simple geometric motifs and a wider exterior molding with perpendicular lines running diagonally towards the center (half a crosspiece on each side leans to the right and the other half to the left, leaving a triangular shape in the center). It is reminiscent of neoclassical models, but with a movement in these diagonals that is not entirely common in this movement. - Size: 73x102
