Description

Rare Art Deco period lamp in large pressed molded glass. The ovoid base is lit in its center. A flight of swallows in relief draws the belly, standing out against a typical Art Deco geometric lineage. The base is topped with a bilobed hat, supported by a delicate wrought iron frame. The same decoration of swallows and curves in relief adorns the whole; this is lit by a central bulb. This mushroom-shaped lamp is very elegant and bright. The alternation of matte and transparent areas as well as the strong relief of the birds give it a "kinetic" momentum and a great modernity.
