Description

This elegant and distinctive ring features a beautifully domed amethyst cabochon with subtle iridescent highlights, reminiscent of the mother-of-pearl hidden behind the amethyst. The gemstone is set in rich 18k yellow gold, creating a soft yet striking contrast between the warm tone of the metal and the cool lavender hue of the stone. The design is both timeless and refined, with gentle curves and a polished finish that highlight the natural beauty of the materials. Perfect for someone who appreciates understated sophistication, this piece can be worn alone as a statement or stacked with other rings for a layered look. The combination of amethyst and mother-of-pearl tones adds a dreamy, almost ethereal quality, making this ring a versatile addition to any jewelry collection. Carefully
