

Bakelite Ring With Chalcedony, Diamonds And Gold Accents

1 200 EUR

Period : 21st century

Condition : Parfait état

Material : Gold

Description

This bold and sculptural ring is a true statement piece, combining vintage charm with contemporary sophistication. The band is crafted from smooth, glossy gray Bakelite, creating a clean, minimalist silhouette. At its center sits a striking cabochon-cut blue chalcedony, domed and polished to reveal its natural translucency and soothing hue. The stone is surrounded by a delicate halo of brilliant-cut diamonds, totaling 0.35 carats, set in yellow gold for a warm and elegant look. The contrast between the industrial look of the Bakelite, the softness of the chalcedony, and the sparkle of the diamonds creates a unique and striking aesthetic. Perfect for collectors or anyone seeking a bold and refined piece, this ring combines texture, color, and sparkle in a harmonious design. Details: Origin:
