Description

19th century Vienna vase in finely enameled silver, decorated with polychrome mythological scenes of great narrative and pictorial richness. The conical body, widening into a corolla, is punctuated by enameled friezes with classical motifs, separating animated scenes of nude or draped figures, in bucolic settings inspired by Antiquity. The domed base rests on a finely chiseled gilt bronze mount, enriched with a putto figure in relief, giving the vase a baroque and theatrical touch. Height: 15 cm
