

Ferrat 18th Century Copper

180 EUR

Period : 18th century

Condition : Bon état

Material : Copper

Diameter : 37,5 cm

Height : 25,5 cm

Description

Large copper ferrat 18th century. Large copper measure reinforced in the upper part with a wrought iron ring on which the copper is folded. Reinforcement in the lower part with copper over a height of 5 cm. Four vertical reinforcements decorated with punched circles stiffen the assembly which is assembled by riveting. The interior of the tank is tinned. This measure is equipped with 2 handles facing each other allowing the transfer operations ... The whole is in a used condition: numerous dents which attest to its use and age. Diameter 37.5 cm Height 25.5 cm
