Description

Today we present a set of gilded wood, on the one hand: five wall lights in the matching model, they each have two lights, the arms supporting the lights are metallic, they are in the Louis XVI style and in our opinion from the end of the 19th century or even 1900 at worst. We join to these five pieces in the model a pair of sculptures still in gilded wood, older. These two sculptures were part of an 18th century mirror, their departure are bird heads, all in very good condition. (E25) Ref: YG 119
