Description

Beautiful coffee table in brazen brass, simulating two tree branches, with a rare Brazilian amethyst geode at its center, made unique by calcite blocks. These are a group of calcite crystals that later crystallized inside the amethyst geode, when mineral-laden water was added to the pocket that housed the amethyst. Length without glass top: 108 cm (42.5 inches) Width without glass top: 80 cm (31.5 inches) Height without glass top: 40 cm (15.8 inches) Biography Richard Faure is a metal sculptor who has hand-crafted many unique decorative objects in brass and semi-precious and precious stones.
