Description

Rare set of 6 glasses, "Venetian coasts" model by Daum. Beautiful collection set for these 6 antique Venetian coast glasses with a salmon-colored rim enhanced with gold comb. The stem is finely curved. Each piece was made by hand, so all are very slightly different. These glasses are clearly referenced among the very first of the illustrious crystal factory. We find this model in the book "Daum in the museums of Nancy", numbered chronologically as numbers 1 and 2, from the very beginning of production in 1885, see last photos. Perfect original condition, gilding well present. Real collector's items, rare
