Description

Remarkable 16cm high stemmed glass, blown in two parts, entirely reworked by wheel to give it this extraordinary inverted pyramid shape at 10 degrees. A fine example of the virtuosity of these workshops in Central Europe mid-18th century, Bohemia or Silesia, here, rim is rectangular with cut angles, leg cut and round base finely engraved on edge. I'm sure you don't have it in your collection. Good condition, you can clearly see the work of craftsman's hand and its small imperfections. Look carefully at our photos....
