Description

Charming pair of antique seascapes, signed oils on canvas, in their richly decorated period frames. These two canvases illustrate two complementary maritime atmospheres: On the left, a peaceful scene of fishermen in a boat at dusk, in soft and luminous tones. On the right, a rough and spectacular sea breaking on the rocks, bathed in a golden light. Both works are distinguished by the quality of their execution, the subtle nuances of the sky and the sea, and the accuracy of the movements of the water and the figures. They form a beautiful decorative and poetic ensemble, ideal for a refined interior.
