(page 191) Pendulum and winding key for the
clock and bell are included. The clock has a
pendulum mechanism; to restart it, the carter
must be secured vertically to allow the pendulum
to move. We recommend consulting a
watchmaker for assistance with this operation. In
the event of delivery by a carrier, we decline all
liability for any damage that may be suffered by
the clock mechanism due to improper handling by
the carrier. Any costs of adjusting the clock by a
specialist would in this case remain
the responsibility of the purchaser. More photos on
