Description

Very beautiful silver lorgnette or binocles, beautiful folding model, the lorgnette part pivoting around an axis to open or close; a small click button is used to release the lorgnette part which comes out pushed back by a spring when this small lever is activated. All the elements of the object are in silver, the lorgnette part is hallmarked on each of its two parts with a boar's head, the suspension bail bears the goldsmith's hallmark NL and a different one. The two beautifully animated plates are very finely and richly worked with motifs of scrolls, foliage, flowers, interlacing and guilloché; the glasses are clear and in very good condition like the whole object.If you have any questions, we are at your disposal._____
